### Predicted Customer Segment:

Based on the input, this customer is likely to be a: **Target Customers (High Income, High Spending Score)** (Cluster 0)

## Customer Segmentation Insights for the Mall

Based on the K-Means clustering, we've identified 5 distinct customer segments:

### 1. Target Customers (High Income, High Spending Score):

- **Prediction:** These are your most valuable customers. They have high purchasing power and are frequent, high-spending shoppers.
- **Action:** Focus on loyalty programs, exclusive offers, premium product launches, and personalized shopping experiences to retain them. Encourage repeat visits through VIP events.

### 2. Careful Customers (Low Income, Low Spending Score):
